

Satellite Set-Top Box for Broadcasting

This set-top box is designed for high-performance satellite communication, providing crystal-clear audio and video. It is suitable for both home entertainment and professional broadcasting environments due to its multiple connectivity options and user-friendly interface.

Overview

Professional Satellite Broadcasting Solution

This high-performance set-top box is engineered for robust satellite and cable communication, supporting advanced video compression standards including H.265, H.264, and MPEG-2. Designed with an ARM Cortex A7 processor, it delivers efficient processing power for professional broadcasting applications. The unit includes comprehensive PVR readiness and EPG support to ensure a seamless and reliable user experience.

Technical Specifications

Processor Performance

3000 DIPs

Processing Power

CPU Architecture

ARM Cortex A7

Connectivity & Standards

Video Codecs

- H.265
- H.264
- MPEG-2

Broadcasting Standards

DVB-S2, DVB-C, DVB-S, DVB-S2X, MPEG-2

Features

Core Features

CAS Supported • USB PVR Ready • 7 Day EPG • Zapper Support
