

SC8D Series Diesel Engine for Industrial Applications

The SC8D Series diesel engine is a robust power solution for diverse industrial uses. Its heavy-duty build ensures durability in demanding settings.

Product Overview

Industrial Power Performance

The SC8D Series Diesel Engine is a robust and reliable power solution engineered for heavy-duty industrial applications. Featuring a high-pressure fuel injection system and an integrated turbocharger, it delivers efficient combustion and increased power output. The unit is designed for demanding environments, incorporating an advanced cooling system to ensure durability and optimal performance consistency.

Technical Features

Engine Technologies

High-pressure fuel injection, Turbocharged, Advanced cooling system

Application

Suitable Applications

- Construction equipment
- Agricultural machinery
- Power generation
- Heavy-duty industrial tasks

Compliance

Environmental Standards

Low Emissions • High Fuel Efficiency
