

Scaling Hammer with Pointed Tip

This scaling hammer features a pointed tip designed for chipping and breaking materials. Its durable handle includes a yellow and black grip for comfortable and secure handling in geological and construction tasks.

Product Overview

Professional Scaling Hammer

This scaling hammer is engineered for precision chipping and material breaking in demanding environments. Featuring a specialized pointed tip, it is an essential tool for geological surveying and construction tasks. The design prioritizes user comfort and control, incorporating a durable handle with a high-visibility yellow and black grip for secure handling during extended use.
