

Scania Truck Brake Drum

This brake drum is suitable for Scania trucks. It is engineered for optimal fit and function, contributing to enhanced safety and extended service life.

Product Overview

High-Performance Brake Drum

This heavy-duty brake drum is engineered to provide reliable and consistent stopping power for commercial vehicles. Constructed from high-grade gray iron and precision-machined via CNC, it is built to withstand demanding operating conditions. Its design prioritizes safety, durability, and effective heat dissipation, ensuring a long service life for heavy-duty applications.

Technical Specifications

Material	Gray iron
Machining Method	CNC Machined
Compatible Vehicles/Brands	Benz, BPW, DAF, Fruehauf, HINO, Iveco, Tatra, Ford, Nissan, Mitsubishi, Scania, SAF, Toyota, Webb, Volvo, MTZ

Order & Logistics

Lead Times

Process	Duration
Mould Production	15-20 days
Sample Preparation	5-7 days
Bulk Production	20 days

Packaging	Pallets
