

Scenic Belt Development Planning

This project provides planning for a scenic belt development. It incorporates residential areas, recreational facilities, parks, and transportation infrastructure along the riverfront.

Project Overview

Hunan Shimeng River-along Scenic Belt Development

This comprehensive development planning project focuses on the revitalization and aesthetic enhancement of the riverfront area in Shimen County, Hunan Province. The design integrates urban planning with natural landscapes, creating a functional and visually appealing scenic belt. Key features include strategic residential zoning, recreational park spaces, and improved transportation infrastructure designed to boost both local utility and tourism appeal.

Project Details

Location	Shimen County, Hunan Province, China
Planning Date	January 2003
