

Scenic Reservoir with Traditional Chinese Architecture

This reservoir offers a scenic view with traditional Chinese architecture. The design incorporates tiled roofs and covered walkways, creating a blend of functionality and aesthetic appeal.

Overview

Scenic Reservoir Integration

The Longyou Muchen Reservoir represents a harmonious blend of civil engineering and traditional aesthetic design. This site features classic Chinese architectural elements, including tiled-roof structures and covered walkways, seamlessly integrated with the natural waterfront environment. It serves as an example of functional water management combined with cultural landscape preservation.
