

# School Bus for Student Transportation

This yellow school bus is designed for student transportation. It is equipped with standard headlights and side mirrors.

## Overview

### Designed for Safe Student Transit

This school bus is purpose-built for the reliable and secure transportation of students in urban environments. Featuring a robust design and high visibility, the vehicle is optimized for daily shuttle operations. It combines functional engineering with safety-focused exterior design to ensure students arrive at their destination comfortably.

## Technical Specifications
