Project Overview

Educational Infrastructure Development

This comprehensive school construction project was established under the Framework Agreement of Exchanging Credit with Petroleum between China and Angola. The initiative focuses on the development and restoration of technical institutes, middle schools, and colleges to facilitate educational recovery. The development encompasses full-scale construction, equipping of laboratories and workshops, and the provision of specialized educational furniture and sports facilities.

Key Metrics

Investment Scale

240 Million RMB
Total Investment

25165 units
Equipment Pieces Provided

Technical Scope

Construction Stages

Stage	Institutes	Middle Schools	Other Facilities
Phase 1	6	4	1 Restoration (Agri College)
Phase 2	4	6	5 Colleges of Administration

Equipment & Amenities

Included Equipment

- Laboratory and Workshop Equipment (60+ labs)
- Classroom and Office Furniture (162 classrooms, 130 offices)
- Multi-media Systems
- Physics, Chemistry, and Biology Lab Instruments
- Machine Tools and Experiment Platforms
- Robotics and Technical Training Software
- Sports Facilities and Gym Equipment
- Automotive and Tractor Training Gear

Project Status

Project Milestones

Phase 1 Completed: 2006, Phase 2 Started: 2007, Government Verified, Educational Infrastructure Standard
