

# Scissor Stone Slab Lifter

This scissor stone lifter is designed for lifting and moving heavy stone slabs and blocks. Its scissor-like mechanism allows for a secure grip, ensuring safe and efficient handling.

## ADDITIONAL IMAGES

## Product Overview

### Precision Stone Handling

The Scissor Stone Slab Lifter is an engineered solution for the safe and efficient transport of heavy stone slabs and blocks. Featuring a gravity-controlled mechanism, the clamp automatically locks and unlocks during the lifting process to ensure operational security. With replaceable vulcanized rubber pads and a protective rubber-lined bar, the tool is designed to provide a firm grip while preventing material chipping and surface damage.

## Technical Specifications

### Load Capacity Range

**300 kg**

Minimum Capacity

**1800 kg**

Maximum Capacity

### Jaw Opening Range

**18 cm**

Minimum Opening

**141 cm**

Maximum Opening

### Construction Features

High-strength steel, Vulcanized rubber pads, Protective rubber-lined bar, Gravity-controlled mechanism

## Operational Features

### Included Components

- Swivel eye
- Bow shackle

### Maintenance

Yes
