

# SCM Series Centrifugal Water Pump

The SCM series centrifugal pump is designed for efficient fluid transfer. It features robust construction for durability and is suitable for clean water and non-aggressive liquids.

## Product Overview

### SCM Series Centrifugal Water Pump

The SCM series centrifugal water pump is engineered for efficient fluid transfer in diverse environments. Built with a robust cast iron housing and corrosion-resistant components, it ensures long-lasting reliability for both industrial and domestic use. The compact design allows for simplified installation, while the high-efficiency motor provides consistent performance across various flow and pressure requirements.

## Technical Construction

Housing Material	Cast Iron
Impeller Material	High-quality engineered materials
Corrosion Resistance	Yes

## Applications

Primary Applications	Domestic Water Supply, Agricultural Irrigation, Industrial Fluid Transfer
----------------------	---

## Fluid Compatibility

### Supported Liquids

- Clean water
- Non-aggressive liquids

## Performance

### Efficiency and Power

**1 High**  
Efficiency Class
