Product Overview

EFI Conversion Kit for GY6 Engines

This comprehensive Electronic Fuel Injection (EFI) kit is designed to upgrade or replace fuel systems in GY6 scooter engines. By converting traditional carburetor setups to electronic fuel injection, this kit enhances engine performance, optimizes fuel efficiency, and ensures compliance with modern emission standards. It is engineered for reliability and precision, making it an essential component for maintenance or performance upgrades.

Compatibility

Engine Sizes	50cc, 60cc, 80cc, 125cc, 150cc
Engine Platform	GY6 Series

Compliance & Standards

Emission Standard
EEC EURO4
