

# Scraper Conveyor Link for Mining Machines

This scraper conveyor link is designed for use in continuous miners and scraper machines. The link is made from high-strength steel to ensure durability.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Mining Conveyor Components

These heavy-duty scraper conveyor links are precision-engineered for continuous miner and scraper systems in demanding underground mining environments. Constructed from high-strength steel alloys, they offer superior resistance to wear, abrasion, and high-tensile stresses. Designed for reliability, these components ensure efficient material transport and long operational life, helping to minimize costly downtime in industrial bulk handling applications.

## Technical Specifications

### Weight Range

**0.5 kg**

Minimum Weight

**100 kg**

Maximum Weight

### Compatible Machinery

Continuous Miner, Scraper

## Material & Construction

### Material Composition

- High-strength steel
- Durable metal alloy
- Wear-resistant surface treatment
