

Screw Extractor Set for Damaged Screws

This set includes five screw extractors designed for removing damaged or stripped screws. Made from high-speed steel, the dual-end extractors ensure durability and efficient performance.

Product Overview

Professional Screw Extraction Solution

This 5-piece screw extractor set is engineered to efficiently remove damaged, stripped, or rusted screws. Crafted from high-speed steel (HSS 4341.2), these tools offer superior durability and resistance to wear. Featuring a versatile dual-end design, the set enables both drilling and extraction, making it an essential addition to any maintenance or repair toolkit.
