

Screw Pin Anchor Shackle

This US type screw pin anchor shackle is a heavy-duty component for lifting and rigging. It is made from high-quality steel, ensuring strength and durability for secure connections in construction, marine, and industrial environments.

Product Overview

US Type Screw Pin Anchor Shackle

This G209 heavy-duty screw pin anchor shackle is designed for professional lifting, rigging, and anchoring applications. Engineered for reliability in demanding environments, it features a robust steel construction that ensures superior strength and safety. The galvanized finish provides essential corrosion resistance, making it an ideal choice for marine, construction, and heavy industrial use.

Technical Specifications

Model Number	G209
Finish	Galvanized, Corrosion Resistant
