

Screw Tap Grinder

This screw tap grinder specializes in sharpening machine tools for screw taps, offering a cost-effective alternative to conventional methods. It provides precise and efficient grinding, saving expenses on blade replacements.

Product Overview

High-precision screw tap grinder for efficient maintenance.

Precision Screw Tap Grinder

This screw tap grinder serves as a highly accurate and efficient alternative to conventional milling processes. It is designed to simplify the sharpening of screw taps, allowing for quick, high-precision results without requiring extensive professional skills. The unit is cost-effective, helping to significantly reduce annual tool replacement expenses while maintaining optimal milling performance.

Technical Specifications

Motor Speed

5300 RPM
Speed

Electrical Requirements

Parameter	Value
Voltage	220V
Power	180W

Grinding Range	M5-M18
Point Angle	5°~30°

Key Features

Key Benefits

- Precise sharpening of spiral tap front cutting lips
- Includes long-life Taiwan diamond grinding wheel
- Easy operation reduces requirement for skilled labor
- Robust and compact design suitable for various workshop sizes

Included Components

Grinding Wheel *2

Collets*6

Fixture Group *3

Includes grinding wheels, collets, and fixture set for immediate operation.

Standard Accessories

Grinding Wheel x2, Collets x6, Fixture Group x3
