

SDS Max Hammer Drill Bit DIN8035

This SDS Max hammer drill bit is designed for drilling in concrete, masonry, and natural stone. The bit conforms to DIN8035 standards for dimensional accuracy and material quality.

Product Overview

High-Performance SDS Max Drill Bit

This SDS Max hammer drill bit is engineered for demanding applications in hard materials such as concrete, granite, and brick. Built to comply with DIN8035 standards, it guarantees dimensional accuracy and consistent material quality for professional use. The design features a robust carbide tip for enhanced durability and an optimized flute geometry that facilitates efficient dust removal, significantly improving drilling speed and performance.

Technical Specifications

Standard Compliance

DIN8035

Key Features

- Robust carbide tip for durability
- Optimized flute geometry for dust removal
- High drilling speed
- Reduced wear and tear

Compatible Materials

Concrete, Granite, Brick, Natural Stone, Masonry

Shank Type

SDS Max
