

SDS Plus Drill Bit for Concrete and Masonry

This drill bit is designed for demanding drilling applications in concrete, masonry, and natural stone. It features a specialized flute geometry for efficient material removal and reduced vibration.

Overview

High-Performance SDS Plus Drill Bit

The FD-A03 is a high-performance drill bit specifically engineered for demanding drilling applications in concrete, masonry, and natural stone. It features a robust construction with specialized flute geometry designed for efficient material removal and significantly reduced vibration during operation. This drill bit ensures extended durability and precise performance, delivering consistent results even in the most challenging professional environments.
