

Sealed Lead-Acid Battery

Sealed lead-acid batteries offer extended operational life and dependable power output. These batteries are commonly used in UPS systems and emergency lighting applications.

Overview

Reliable Power Solutions

This sealed lead-acid battery is engineered for long-lasting performance and consistent power delivery in demanding environments. Designed for maintenance-free operation, it features a spill-proof construction that ensures safety and reliability. It is an ideal choice for critical power applications, including UPS systems and emergency lighting setups.

Key Features

Certifications

CE Certified

Design Attributes

Maintenance-Free, Spill-Proof, Long Life

Applications

Typical Applications

- UPS Systems
- Emergency Lighting
- Critical Power Backups
