

Sealed Lead-Acid Battery for Electric Bikes

This sealed lead-acid battery is designed for electric bikes and scooters. The 6-DZM-10 battery provides reliable power and long-lasting performance.

Product Overview

High-Performance Electric Vehicle Power

This sealed lead-acid battery is specifically engineered for electric bicycles and scooters, offering a reliable and maintenance-free power solution. Designed with a robust, spill-proof construction, it ensures safety and longevity in demanding electric vehicle applications. Its efficient energy storage capabilities provide consistent performance for daily commuting needs.

Technical Specifications

Model Number	6-DZM-10
Application	Electric Bicycles, Electric Scooters, Electric Vehicles

Performance Features

Core Features

- Sealed lead-acid technology
- Spill-proof design
- Maintenance-free operation
- Robust construction
