

Sealed Lead-Acid Battery for UPS and Emergency Systems

These sealed lead-acid batteries are designed for applications such as UPS systems, emergency lighting, and security systems. The maintenance-free and spill-proof design ensures safe operation in any orientation.

Product Overview

Reliable Sealed Lead-Acid Technology

These sealed lead-acid batteries are engineered for high performance in critical applications such as UPS systems, emergency lighting, and security setups. They are designed to be entirely maintenance-free and spill-proof, providing safe operation in any mounting orientation. With a wide range of voltage and capacity options available, these units offer a versatile and dependable energy storage solution.

Technical Specifications

Key Metrics

6 V

Min Voltage

12 V

Max Voltage

28 AH

Max Capacity

Voltage Range

6V - 12V

Capacity Range

1.2AH - 28AH

Features

Key Features

Maintenance-Free, Spill-Proof, Rechargeable, Versatile Orientation

Applications

Primary Applications

- UPS Systems
- Emergency Lighting
- Security Systems
