

Sealed Self-Aligning Roller Bearing 50x90x28mm

This is a self-aligning roller bearing with cylindrical bore and double seals. It measures 50mm x 90mm x 28mm and weighs 0.7 KGS.

Product Overview

High-Performance Self-Aligning Bearing

This sealed self-aligning roller bearing is designed for demanding industrial applications requiring reliable operation under misalignment conditions. Featuring a spherical outer raceway and double-row design, it ensures consistent contact and smooth rotation. The integrated sealing system provides essential protection against contaminants, effectively extending service life and reducing maintenance requirements.

Technical Specifications

Bore Diameter	50 mm
Outer Diameter	90 mm
Width	28 mm
Design Features	Self-aligning, Double raceways, Spherical outer groove, Sealed
