

Sealing Gasket Washer

This is a gasket and washer combination. It provides a seal for various applications.

Product Overview

Reliable Sealing Solution

This sealing gasket washer is engineered for high-performance fluid containment and leak prevention in demanding industrial environments. Designed for durability, it ensures a tight, secure seal in various mechanical assemblies and pumping systems. Its robust construction makes it an essential component for maintaining system integrity and operational efficiency.

Technical Specifications

Key Features

- High-pressure sealing capability
- Corrosion-resistant material
- Precision-engineered dimensions
- Compatible with gasoline-powered pump units

Component Type	Sealing Gasket Washer
Common Applications	Water Pumps, Irrigation Systems, Construction Equipment, Fluid Transfer
