

Sealing Wire for Packaging Machinery

This high-precision sealing wire integrates a power supply and plug for seamless use in packaging machinery. It ensures reliable and consistent sealing performance across diverse packaging applications.

Product Overview

High-Precision Sealing Performance

This sealing wire is engineered for high-precision performance within industrial packaging machinery. Designed for reliability and consistency, it ensures optimal sealing quality across various packaging applications. The unit includes an integrated power supply and standard plug, facilitating seamless integration into your existing production systems.

Technical Specifications

Model Identifier	PG180-D
Key Features	High-Precision, Durable Heating Element, Integrated Power Supply, Standard Connection
System Integration	Yes
