

Seamless Forged Steel Tee Fitting

This fitting is made from carbon steel and stainless steel. It is designed for branching connections in industrial piping systems.

Product Overview

Seamless Forged Steel Tee Fitting

This seamless forged steel tee fitting is engineered for high-pressure industrial piping systems requiring reliable branching connections. Constructed from durable carbon steel and stainless steel, it ensures excellent structural integrity for the transport of various fluids and gases. The product is manufactured to rigorous standards for dimensional accuracy and material strength, making it suitable for demanding infrastructure projects.

Technical Specifications

Material Composition	Carbon Steel, Stainless Steel
Fitting Type	Straight Tee

Logistics and Trade

Departure Ports

- TIANJIN
- SHANGHAI

Accepted Payment Terms

L/C • T/T

Packaging Details	Plywood Cases
Delivery Time	Within 30 days after contract signing
