

Seawater Circulating Pump Gearbox

This gearbox is designed for seawater circulating pumps. It features corrosion-resistant materials, inspection ports, and precision-engineered gears for efficient power transmission.

Product Overview

Marine-Grade Performance

This robust gearbox is specifically engineered for seawater circulating pump applications, ensuring reliable power transmission in harsh marine environments. The unit features a durable cylindrical housing constructed from corrosion-resistant materials to withstand constant exposure to saltwater. Designed for demanding industrial use, it includes integrated lubrication points and precision-engineered internal gears to maintain high efficiency and longevity.

Technical Design

Housing Features

- Cylindrical housing
- Multiple access ports
- Integrated piping systems

Mounting Configuration

Flanged base for secure, high-stability installation

Maintenance & Reliability

Maintenance Points

Inspection ports, External lubrication points

Environment & Compliance

Operational Environment

Seawater resistant • Marine grade
