

Sectional Drain Cleaning Machine

This sectional drain cleaning machine is applicable for pipes of \varnothing 200-600mm in civil projects. The machine features removable sectional flexible shafts with large bending, twisting, and ductility resistance.

Overview

Professional-grade sectional drain cleaning equipment designed for heavy-duty pipe maintenance.

Professional Power Sectional Drain Cleaner

The GQ-600 is a robust and efficient power sectional drain cleaning machine engineered for clearing complex blockages in civil and industrial drainage systems. Featuring a high-torque 1.5kW motor and a versatile four-speed transmission, it allows operators to precisely adjust spinning speeds to match specific application requirements. Its sectional design with flexible shafts ensures easy transportation, assembly, and extended reach, making it an essential tool for professional plumbing and maintenance personnel.

Technical Specifications

Robust construction featuring a high-torque motor for consistent performance in demanding environments.

Applicable Pipe Diameter	200-600mm (8-24 inches)
Rated Power	1.5 kW
Operating Speed Range	180-600 rpm (4-speed transmission)
Voltage Options	220V, 110V
Frequency Options	50Hz, 60Hz

Design & Features

The four-wheel cart design ensures easy mobility and stability when rolling to the job site.

Mobility

Four-wheel cart • Portable • Heavy-duty

Key Operational Benefits

- High bending and twisting resistance
- Variable speed control for different applications
- Sectional design allows for extended length
- Easy to assemble and transport

Flexible Shaft Diameter	8mm (5/16 inch)
