

Seed Oil Press Machine

This seed oil press is designed for extracting oil from various seeds and nuts. It offers continuous operation and high oil output, making it suitable for processing peanuts, beans, sesame, and sunflower seeds.

Product Overview

Professional Seed Oil Extraction

The YZS-80 seed oil press is a high-performance industrial solution designed for efficient and continuous oil extraction. Featuring a durable heavy-duty construction and a large feeding hopper, it is optimized for small to medium-scale agricultural operations. The system provides a high-yield pressing chamber and adjustable discharge mechanisms to ensure consistent results across various seed types.

Technical Specifications

Operational Features

- Heavy-duty construction
- Continuous feeding hopper
- High-yield pressing chamber
- Adjustable discharge mechanism

Model Identifier	YZS-80
Motor Power	5.5 kW
Processing Method	Hot Extruding
