

Segmented Color LED Bulb

This LED bulb features segmented color technology, allowing adjustable color temperature settings. It offers warm white, neutral white, and cool white modes for customized lighting environments.

Product Overview

Versatile Segmented Lighting

This advanced LED bulb features innovative segmented color technology, allowing users to switch between three distinct color temperatures without the need for a dimmer switch. Designed with a unique ballet skirt aesthetic, it utilizes high-quality internal components to ensure reliable performance. The built-in intelligent memory feature remembers your preferred setting, making it an ideal, energy-efficient lighting solution for homes, offices, hotels, and restaurants.

Technical Specifications

Item Number	L-BL-0802
Voltage Range	100-240V
Power Consumption	9W / 3.6W / 1.3W
Luminous Flux	810 lm
Beam Angle	200 °
Power Factor	0.5
Available Color Temperatures	3000K, 4000K, 6500K
CRI	80
Rated Lifetime	25000 hrs

Physical Attributes

Design & Fitting

Attribute	Value
Shape	A60
Base Type	E27 / B22
Dimensions	∅60*111mm

Features

Key Features

- 3 color options in one bulb
- Built-in intelligent memory feature
- Easy to install (no switch change required)
- Direct replacement, no dimmer required
- Elegant ballet skirt design
- Eco-friendly construction
