

Segmented Diamond Saw Blade for Stone and Concrete

This diamond saw blade is designed for cutting through hard materials such as concrete, stone, and tile. It features a segmented rim for efficient material removal and cooling slots to reduce heat buildup.

Product Overview

Professional Segmented Diamond Blade

This high-performance segmented diamond saw blade is engineered for precision cutting in demanding materials like stone, concrete, and tile. The segmented rim design ensures rapid material removal and superior cooling, while integrated slots effectively manage heat buildup for extended tool life. It is compatible with standard power tools including angle grinders and circular saws, making it a versatile choice for site work.

Technical Specifications

Key Features

- Segmented rim for efficient cutting
- Integrated cooling slots
- Standard arbor sizing

Recommended Tools

Angle Grinder • Circular Saw

Compatible Materials

Concrete, Stone, Tile
