

Segmented Rim Diamond Grinding Wheel

This diamond grinding wheel is designed for precision cutting and grinding applications. Its segmented rim ensures efficient material removal and minimizes heat buildup during use on hard materials.

Product Overview

Precision Segmented Diamond Grinding Wheel

This segmented rim diamond grinding wheel is engineered for high-efficiency material removal on demanding surfaces. Its specialized design ensures effective heat dissipation, which prolongs the tool's lifespan while maintaining consistent performance. It is the ideal solution for professional applications involving stone, concrete, and ceramics.

Technical Specifications

Rim Type	Segmented
Compatible Materials	Stone, Concrete, Ceramics

Performance

Key Performance Features

- Efficient material removal
- Reduced heat buildup
- Long service life
- Consistent grinding results
