

Segmented Turbo Concrete Grinding Cup Wheel

This segmented turbo cup wheel is designed for efficient grinding and material removal. It features a segmented rim for aggressive cutting action, enhanced cooling, and a smooth finish on concrete, stone, and masonry.

Product Overview

High-Efficiency Grinding Solution

The Segmented Turbo Concrete Grinding Cup Wheel is engineered for aggressive material removal and efficient surface preparation. Featuring a distinct segmented rim design, this tool promotes enhanced airflow for cooling during operation, ensuring consistent performance. It is an ideal choice for professionals working with concrete, stone, and masonry, providing both rapid cutting action and a smooth, reliable finish.

Technical Specifications

Compatible Materials	Concrete, Stone, Masonry
Compatible Tools	Angle Grinders

Key Features

Design Advantages

- Segmented rim for aggressive cutting
- Enhanced cooling system
- Long-lasting performance
- Smooth finish capability
