

Self-Adhesive Electrical Insulation Tape

This self-adhesive tape offers fire resistance and high-temperature performance for electrical insulation. It is waterproof and designed for secure bonding in a variety of electrical applications.

Product Overview

High-Performance Electrical Insulation

This self-bonding rubber insulation tape is engineered for high-voltage applications, providing reliable electrical insulation and protection in power generation and distribution systems. Designed for both indoor and outdoor use, the tape offers excellent resistance to moisture, chemicals, and temperature variations. Its self-adhesive properties ensure easy application and a secure, long-lasting bond for critical electrical connections.

Technical Specifications

Voltage Rating

10 KV

Max Voltage

Dimensions

0.8mm x 25mm x 5y

Compliance Standards

ISO9001, Q/0205HJS001-2014, ROHS

Application Features

Key Features

- Self-bonding rubber material
- High-voltage electrical insulation
- Moisture and chemical resistant
- Suitable for underwater applications
- Lead-free composition

Suitable Environments

Power Generation • Distribution Systems • Underwater • Indoor • Outdoor
