

Self-Ballasted Induction Lamp (12W-40W)

This self-ballasted induction lamp provides efficient and long-lasting illumination. Available in power ratings from 12W to 40W, it provides a versatile lighting solution for various applications.

Product Overview

Versatile Induction Lighting

This self-ballasted induction lamp offers highly efficient and long-lasting illumination suitable for a variety of residential and commercial environments. By integrating the ballast directly into the lamp, installation is simplified while ensuring optimal performance and reliability. Designed for durability, this solution helps reduce long-term maintenance costs through its extended operational lifespan and superior energy efficiency.

Technical Specifications

Power Rating Range	12W, 40W
Ballast Configuration	Integrated Self-Ballasted

Key Features

Advantages

- High energy efficiency
- Extended service life
- Reduced maintenance costs
- Simplified installation

Application

Compatible Environments

Residential • Commercial
