

# Self-Cleaning Dual Chamber Bucket

This self-cleaning bucket features a dual-chamber design with integrated rotating scrubbers for efficient dirt and debris removal. A central collection container separates clean and dirty water, while a foot-operated lever allows for hands-free operation.

## ADDITIONAL IMAGES

## Product Overview

### Innovative Self-Cleaning Solution

The self-cleaning dual-chamber bucket is designed to streamline cleaning workflows by separating clean and dirty water effectively. Featuring integrated rotating scrubbers, it ensures debris is removed efficiently from cleaning tools. Its durable construction and hands-free foot-operated lever make it a reliable and hygienic choice for professional or residential environments.
