

Self-Closing Braided Cable Wrap

This self-closing braided wrap is designed for effective cable management. It provides abrasion resistance while bundling wires together for protection.

Product Overview

Innovative Cable Protection Solution

The self-closing braided wrap is a high-performance cable management solution designed to protect wire harnesses and breakout areas. Its unique open-structure design allows for rapid installation and removal, making it perfect for maintained systems where periodic inspection is necessary. Engineered with strong resilience, it provides exceptional abrasion and flame resistance for industrial and manufacturing environments.

Technical Features

Material Composition

- Monofilament polyester yarns (weft)
- Multifilament polyester yarns (warp)

Installation

Self-closing open structure

Performance Metrics

Performance Features

Abrasion Resistance, Flame Resistance, High Resilience, Flexible

Application

Recommended Applications

- Wire harness assembly
- Automatic equipment
- Railways
- General manufacturing
