

Self-Contained Natural Gas Compressor Station

This self-contained natural gas compressor station is engineered for continuous operation. The unit features a high-efficiency compressor, gas cooler, and storage tank within a robust enclosure.

Product Overview

Self-Contained Natural Gas Compressor Station

This self-contained natural gas compressor station is engineered for continuous industrial operation. The unit integrates a high-efficiency compressor, a dedicated gas cooler, and an onboard storage tank within a single, robust enclosure. Designed for seamless integration into existing gas distribution networks, it features advanced control systems to ensure both optimal performance and operational safety.

Technical Specifications

Integrated Components

- High-efficiency compressor
- Gas cooler
- Storage tank
- Advanced control system

Model

CGS7.5

Operational Features

Operation Type

Continuous Operation

Primary Use

Industrial, Gas Distribution, Compression
