Self-Drilling Pan Head Screw

This self-drilling screw is designed with a drill point to eliminate the need for pre-drilling. The pan head offers a large bearing surface, providing increased holding power and a neat appearance.

Product Overview

Professional Grade Self-Drilling Fastener

This pan head self-drilling screw is engineered for efficient and secure fastening across diverse material types, including metal, wood, and plastic. Featuring a specialized drill point, it eliminates the need for pre-drilling, significantly reducing assembly time and labor effort. The pan head design provides a large bearing surface, ensuring superior holding power and a clean, professional finished appearance.

Key Features

Operational Benefits

- Integrated drill point eliminates pre-drilling
- Large bearing surface for increased holding power
- Time and labor-saving installation
- Provides a clean, finished aesthetic

Compatible Materials	Metal, Wood, Plastic

Technical Design

Head Type	Pan Head
Installation Method	Self-Drilling
