Product Overview

Efficient Portable Climate Control

This self-evaporating portable air conditioner is designed for optimal efficiency and ease of use in diverse indoor environments. By recycling condensing water to cool the condenser, the unit enhances performance while saving energy. With its sleek, streamlined design, integrated handles, and auto-swing directional airflow, it provides powerful, localized cooling with minimal noise.

Performance & Capacity

Water Tank Capacity	6.5 L
Inlet Water Capacity	2.5 L
Cooling Modes	Water-cooled mode, Standard cooling, Dehumidification

Features & Controls

Smart Functionality

- Self-evaporative system
- Self-diagnosis function
- 24-hour On/Off timer
- Economy energy-saving mode
- Auto swing airflow

Interface	Flashing colorful screen display
