

Self-Fusing Electrical Insulation Rubber Tape

This self-fusing rubber tape provides waterproof insulation for electrical applications. It offers fire resistance and maintains its properties in high-temperature environments.

Product Overview

High-Performance Self-Fusing Insulation

This self-fusing electrical insulation rubber tape is engineered for reliable performance in demanding electrical environments. Featuring excellent self-bonding properties, it creates a tight, secure, and moisture-resistant seal for electrical connections and components. Designed to support high-voltage applications, it provides a durable and long-lasting insulation solution suitable for professional industrial and maintenance use.
