

# Self-Leveling 5-Line Laser Level with Plumb Points

This self-leveling laser level projects five lines and includes two plumb points for comprehensive alignment. Its integrated Li-ion battery ensures extended runtime and enhanced productivity.

## Product Overview

### Precision Alignment Solution

This self-leveling laser level is engineered for high-precision construction and alignment tasks. Featuring a 5-line laser projection and two plumb points, it provides comprehensive coverage for horizontal and vertical layout applications. Its robust design and integrated long-lasting Li-ion battery make it a reliable tool for demanding job site environments.

## Technical Specifications

### Adjustment Features

- Self-leveling mechanism
- Rotating base with angular graduations

### Laser Configuration

5-Line Projection, 2 Plumb Points

### Power Source

Integrated Li-ion Battery

## Key Metrics

### Performance Metrics

**5 lines**
