

# Self-Leveling Laser Level

This auto-leveling laser level projects highly visible horizontal and vertical lines for precise alignment and leveling tasks. The device incorporates a self-leveling mechanism, ensuring accuracy and efficiency.

## ADDITIONAL IMAGES

## Product Overview

### Precision Alignment Solution

This self-leveling laser level is a precision tool designed for accurate horizontal and vertical alignment in indoor and outdoor applications. Featuring an advanced self-leveling mechanism, it ensures quick and reliable measurements for construction and installation tasks. Its compact, durable design includes versatile mounting options, making it a dependable choice for professionals requiring efficient performance in demanding environments.

## Technical Specifications

### Working Range

**7 m**

Working Range

Accuracy	0.5 mm/m
Wavelength	650 nm
Laser Class	Class 2

## Power & Environment

Laser Power	<1mw
Power Source	2 x AA Batteries
Operating Temperature	0-40°C
