

Self-Loading Concrete Mixer

This self-loading concrete mixer is designed for efficient concrete production at construction sites. It features a rotating drum with mixing blades and a skip for loading raw materials.

Product Overview

Efficient On-Site Concrete Production

This self-loading concrete mixer is designed for efficient and reliable concrete production directly on construction sites. Featuring a robust frame and a high-performance rotating drum with specialized mixing blades, it ensures consistent material quality. It is an ideal solution for small to medium-sized construction projects that require rapid, on-demand concrete mixing.

Technical Specifications

Key Components

- Robust structural frame
- Rotating mixing drum
- High-efficiency mixing blades
- Material loading skip

Power System	Electric Motor
Loading Method	Integrated Skip Loading

Application

Best Suited For	Small Construction Projects, Medium Construction Projects, On-site Concrete Mixing
