

Self-Priming Centrifugal Seawater Pump

This self-priming centrifugal pump is designed for seawater applications. It features a durable cast iron construction with a corrosion-resistant coating and bronze impeller.

Product Overview

High-Performance Seawater Circulation

These self-priming centrifugal pumps are engineered for demanding marine, agricultural, and industrial applications. Built with durable corrosion-resistant materials, they feature bronze impellers and double-sealed bearings for extended service life in harsh environments. The belt-driven design ensures reliable and consistent water transfer for cooling and circulation processes.

Key Features

Materials & Design

Cast Iron Construction, Corrosion-Resistant Coating, Bronze Impeller, Double-Sealed Bearings, Belt-Driven Pulley System

Technical Specifications

Operating Parameters

Model	Lift (m)	Flow (m3/h)	Power (kw)	Inlet/Outlet
CR100	12	18	2	1"
CR125	15	20	2.5	1.25"
CR150	18	22	3	1.5"
CR200	21	28	4.5	2"
TB150	21	28	3	1.5"
TB200	28	35	4.5	2"

Rated Speed

3000 rpm
