

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump features a robust engine. It is designed for efficient water transfer in applications like irrigation, construction, and emergency water removal.

Overview

High-Efficiency Water Transfer

This self-priming centrifugal water pump is engineered for robust and reliable performance in demanding environments. Featuring a high-flow design and an easy-start mechanism, it is suitable for diverse applications ranging from large-scale irrigation to construction and emergency water removal. The unit is housed within a protective metal frame to ensure maximum durability and portability on-site.

Technical Specifications

Engine Power Output

6.5 HP

Rated Power

Pump Configuration

Self-priming centrifugal

Suitable Applications

Irrigation, Construction, Emergency Water Removal

Features & Build

Design Features

- Protective structural frame
- Easy-start engine mechanism
- Durable pump housing
- Portable design
