Product Overview

Self-Priming Centrifugal Pump

The Jet Series water pump is a robust, self-priming centrifugal solution designed for reliable water supply and pressure boosting. Engineered for versatility, it is suitable for residential, agricultural, and light industrial applications involving clean water sources like wells and tanks. With a durable cast iron body and integrated thermal overload protection, this pump ensures consistent performance and safety in demanding environments.

Technical Specifications

Safety Features

Thermal Overload Protection • Automatic Operation

Model Number	JET60-200
Frequency	50Hz, 60Hz
Pump Type	Self-priming Centrifugal

Construction & Materials

Pump Body	Cast Iron
Impeller	Corrosion-resistant

Installation & Use

Suitable Applications

- Residential Water Supply
- Agricultural Irrigation
- Pressure Boosting
- Industrial Applications

Connection Type	NPT Threaded
