Product Overview

High-Efficiency Centrifugal Pump

This self-priming centrifugal water pump is designed for reliable and efficient water transfer in irrigation and drainage applications. The unit features a robust engine with a flat key shaft connection for enhanced durability and performance. Engineered for easy maintenance, the pump requires no special tools for assembly or disassembly, making it a convenient choice for professional field operations.

Technical Design

Maintenance & Convenience Features

- M10 maintenance thread on impeller for easy disassembly
- Submerged gasket installation to prevent edge extrusion
- Tool-less assembly and disassembly
- Large ear plastic pipe joints for manual operation
- Thickened water injection and drain screw plugs

Performance

Engine Identification	RT50ZB28-3.6Q
Key Applications	Irrigation, Drainage, General Water Transfer
