

Self-Priming Centrifugal Water Pump

This self-priming centrifugal pump is designed for efficient water transfer. Its sturdy frame ensures stability during operation, making it suitable for farms and construction sites.

Product Overview

High-Efficiency Irrigation Solution

The SB-50 is a high-performance self-priming centrifugal water pump engineered for agricultural drainage and irrigation tasks. Its robust construction ensures long-term reliability in demanding environments like farms and construction sites. The unit features a powerful engine and a reinforced frame, providing exceptional stability and efficient water transfer performance.

Product Details

Model Name	SB-50
Pump Type	Centrifugal, Self-Priming

Applications

Primary Applications

- Agricultural drainage
- Field irrigation
- General water transfer
- Dewatering construction sites

Features

Key Features

Heavy-duty frame • High-efficiency water transfer • Stable operation • Robust engine
