

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for irrigation, drainage, and water transfer. The pump features a robust engine and durable metal housing.

General Overview

Versatile Centrifugal Water Pump

This self-priming centrifugal water pump is engineered for demanding fluid transfer applications including irrigation and site drainage. Encased in a robust metal roll cage, it offers superior protection and portability for professional field use. Its reliable design ensures efficient operation for general water management needs in various environments.

Technical Specifications

Pump Type	Self-Priming Centrifugal
Model Identifier	ETP50
Build Material	Metal Housing, Protective Roll Cage

Application

Suitable Applications

- Irrigation
- Drainage
- General Water Transfer
