

Self-Priming Centrifugal Water Pump with Pressure Tank

This self-priming water pump features a centrifugal pump coupled with a pressure tank and control system. It is designed for maintaining water pressure in residential or light commercial applications.

Product Overview

Integrated Pressure Solution

This self-priming centrifugal water pump is designed as a robust, integrated solution for maintaining consistent water pressure in residential and light commercial settings. It features a high-efficiency centrifugal pump mounted securely onto a horizontal pressure tank, ensuring a compact footprint and reliable operation. Equipped with a dedicated control system and a clear pressure gauge, this unit provides automated, maintenance-friendly water delivery.

Technical Specifications

System Components

- Centrifugal Pump
- Horizontal Pressure Tank
- Pressure Gauge
- Electrical Control Box
- Connecting Pipes and Fittings

Pump Type

Self-priming centrifugal

Key Features

Design Features

Self-priming • Automated Control • Space-saving Design

Common Applications

Residential, Light Commercial, Pressure Boosting
