Product Overview

Self-Priming Deep Well Jet Pump

This self-priming jet pump is specifically engineered for deep well applications, offering reliable water supply solutions for residential and light commercial environments. Designed for continuous duty, it features a robust construction that ensures long service life and consistent performance. The unit includes an integrated pressure gauge for real-time monitoring, making it an efficient choice for demanding water delivery tasks.

Operating Limits

Max Liquid Temperature	60
Max Ambient Temperature	40
Duty Cycle	Continuous duty

Application

Suitable Applications	Residential, Light Commercial, Agricultural, Deep Well Water Supply
